

Pranesh G

Principal Engineer

prans1991@gmail.com | +91-9443329991 | pranesh.link

Professional Summary

Principal Engineer with **13+ years of experience** designing and scaling **enterprise digital platforms and intelligent systems**. Expertise in **React and Next.js architectures, micro frontend platforms, server driven UI, and performance engineering** focused on **Core Web Vitals**. Strong foundation in **TypeScript, Node.js, HTML5, CSS3, and modern testing practices**. Expanding into **AI native and data driven platform development** using **Python and FastAPI**, with a focus on **context engineering, agentic workflows, and intelligent automation**. Experienced in **cloud native delivery on AWS** including **S3, CloudFront, Route53, and CloudFormation**, supported by **CI CD pipelines** to build scalable and reliable platforms.

Technical Expertise

Frontend Architecture, Backend Technologies

Modern React, Next.js, Node.js, scalable UI architecture, server-driven UI, micro frontend architecture

Core Web Technologies, Testing & Quality

TypeScript, JavaScript, HTML5, CSS3, SASS, Jest, React Testing Library

Performance Engineering

Rendering optimization, caching strategies, and Core Web Vitals optimization

Data Engineering

Python, FastAPI

Cloud & Delivery

AWS S3, CloudFront, Route53, CloudFormation, CI/CD pipelines with Git and Jenkins

Emerging Technologies

Agentic AI driven frontend development and intelligent automation workflows

Architecture & Platform Experience

- Designed and implemented scalable frontend architectures for multi-module enterprise applications serving high-volume user workflows
- Defined server-client boundaries and state management strategies to improve performance, maintainability, and extensibility
- Led architecture reviews and established frontend best practices, improving code consistency and reducing regressions
- Contributed to long-term platform strategy by building reusable UI foundations and shared component libraries

Professional Experience

Principal Engineer

Eli Lilly and Company, Bengaluru | Jul 2024 – Present

- Lead frontend architecture and technical direction for enterprise web platforms
- Own UI initiatives end-to-end, aligning with product roadmap and business goals
- Define performance-focused architecture to improve responsiveness and long-term scalability
- Develop internal tooling and AI-enabled solutions to standardize and accelerate UI development
- Partner with product, design, and backend teams to deliver scalable frontend systems

Senior Lead Engineer

Brillio Technologies, Bengaluru | Jan 2021 – Jun 2024

- Led frontend development across multiple large-scale client programs
- Championed adoption of modern React patterns to improve scalability and maintainability
- Guided teams on architectural decisions, code quality standards, and modular design principles

Manager

Standard Chartered GBS, Bengaluru and Chennai | Jun 2012 – Jan 2021

- Led frontend teams delivering business-critical banking applications
- Balanced team leadership responsibilities with hands-on technical contributions
- Improved engineering workflows and frontend development standards

Leadership & Impact

- Mentored senior and mid-level frontend engineers across teams
- Led technical discussions and architecture forums
- Influenced cross-functional stakeholders to align technical direction with product and business objectives

Key Achievements

- Improved page performance and user experience across critical workflows
- Accelerated development cycles by approximately 40–50 percent through AI-driven engineering workflows
- Scaled design system adoption across multiple teams to improve UI consistency and reduce duplicate effort

Education

Bachelor of Engineering (B.E.)

Sri Krishna College of Engineering and Technology
